

What are the areas of SEND?

Communication and Interaction:

Children with speech, language and communication needs (SLCN) have difficulty communicating with others and may also not understand and use social rules of communication. This often includes children with Autism Spectrum Disorder, including Asperger's.

Cognition and Learning:

Learning difficulties cover a wide range of needs, including moderate learning difficulties (MLD), and severe (SLD), where children are likely to need support in all areas of the curriculum. Specific Learning difficulties (SpLD), affect one or more specific aspects of learning. This encompasses a range of conditions such as dyslexia, dyscalculia and dyspraxia.

Social, emotional and mental health difficulties:

Children may experience a wide range of social and emotional difficulties. These may include becoming withdrawn and isolated, as well as displaying challenging, disruptive or disturbing behaviour. Other children may have disorders such as attention deficit disorder, attention deficit hyperactive disorder or attachment disorder

Sensory and/or physical needs:

These include vision impairment, hearing impairment or multi-sensory impairment which will require specialist support and/or equipment or access their learning. Some children with a physical disability require ongoing support and equipment to access all the opportunities available to their peers.
