

Enrichment

Hunningley Primary Academy work hard to offer all children with a wide range of enrichment clubs and activities that contribute towards their personal development and overall character. We work incredibly hard to ensure that all focus groups have fair and equal access and that we offer clubs and enrichment opportunities that spark and entice our children's interests. We ensure that there is equality for all and that all boys, girls and those who may identify as gender neutral are able to take part in any club or activity that they desire. Our staff members work hard to offer clubs that our children may have not had the chance to experience in life and they ensure that strengths are identified so that children can be encouraged to pursue their interests further outside of the school setting.
